BreatheSafe 240V Vacuum Features:

- Wet/Dry Type H Vacuum Cleaner
- Heavy Duty Motors
- Large Capacity Tank
- Includes 3-meter Hose and Accessories: 450mm Brush Nozzle, 450mm Squeeze Nozzle, Round Crevice Tool & Stainless 2-piece Extension Tube

Applications

BreatheSafe PN: TV24077 Wet/Dry HEPA 240V Vacuum

- All HME including light/medium vehicles

Background:

Cabin doors and windows may be frequently opened by operators rendering HEPA filtration-pressurisation systems ineffective. Also, dust contamination is brought into the cabin on the operator's shoes and clothing. The use of a HEPA vacuum to clean the cab interior will reduce secondary exposure of the operators and enhance the BreatheSafe HEPA air filtration systems.

Case Study: Dried Mud

- Dried mud forms fine dust particles
- Dust is easily disturbed and gets in the air
- Simply closing the door can cause high levels of airborne dust in the cabin
- Vibration in the cabin will also cause dust to become airborne.
- You may be exposed to high levels of silica dust from opening and closing the door
